SUMMARY

Senior Frontend Developer with expertise in building scalable, high-performance web applications and intuitive user experiences. Experienced in modern JavaScript frameworks, component-driven architecture, frontend optimization, and full-stack feature development. Proven track record of translating complex business requirements into clean, maintainable solutions while collaborating closely with design, product, and engineering teams. Skilled in delivering pixel-perfect interfaces, improving application performance, and driving product quality through thoughtful architecture and attention to detail. Passionate about creating seamless digital experiences that balance usability, performance, and business impact.

WORK EXPERIENCE

E9 Solutions - UK Based (Senior Frontend Developer)

May 2023 - Present

- Designed and developed intuitive user interfaces for AI-powered applications, simplifying complex workflows into seamless user experiences.
- Built frontend experiences for AI agents, translating sophisticated automation and decision-making processes into easy to use, user-friendly interfaces.
- Collaborated with product, design, backend, and AI teams to deliver AI-driven features from concept to production.
- Designed and built an entire storybook component library that the entire company has been using across their portals. Reusable and scalable frontend components using modern JavaScript frameworks, improving maintainability and development efficiency.
- Integrated AI models and backend services into production-ready applications while ensuring performance, accessibility, and responsiveness.
- Designed and worked on multiple products throughout different applications for the company.
- Recognised for strong UX and product thinking, leading design decisions across key product initiatives and being considered for a future UX leadership role.

Hyperverge Technologies (Internship)

June 2022 - Jan 2021

- Built the frontend for their latest 0-1 product which was a CLM tool used by lawyers and companies to help them with their pre and post execution phase.
- Exposure to numerous libraries and a basic understanding of encryption and decryption.
- Gained an improved comprehension of building responsive and reusable components with React.
- The product's requirements called for me to quickly devise inventive solutions to various issues, requiring me to think creatively and act fast as a developer.

Freelance Projects

June 2022 - Present

- Delivered 15+ web and mobile projects spanning e-commerce platforms and applications for U.S. healthcare departments, consistently meeting scope, timeline, and quality targets.
- Deepened expertise in modern CSS and advanced selector strategies, enabling pixel-perfect, responsive interfaces.

- Led end-to-end product cycles: gathered requirements, produced wireframes/prototypes, coded production UI, and oversaw hand-off to back-end teams.
- Cultivated strong client communication skills, translating non-technical requirements into actionable tasks
