SUMMARY

Senior Frontend Developer with 4+ years of professional experience building scalable, high-performance web applications and intuitive user experiences. Specialised in modern JavaScript frameworks, component-driven architecture, and AI-facing product interfaces. Proven track record of translating complex business requirements into clean, maintainable solutions while collaborating closely with design, product, and engineering teams. Skilled in delivering pixel-perfect interfaces, improving application performance, and driving product quality through thoughtful architecture and attention to detail.

WORK EXPERIENCE

E9 Solutions - UK Based (Senior Frontend Developer)

May 2022 - Present

- Designed and developed intuitive user interfaces for AI-powered applications (Cab9 platform), simplifying complex dispatcher workflows into seamless user experiences.
- **AnjAI Voice:** a conversational portal where dispatchers speak or type commands to an AI that executes tasks autonomously; interface modelled on ChatGPT style UX/UI.
- **AnjAI Summarise:** a one-click summarisation button integrated across multiple Cab9 portals, enabling dispatchers to instantly digest booking and driver details.
- **AnjAI Forecast:** developed the forecasting model integration and full frontend for predicting upcoming bookings over a 12 hour horizon using weather data, historical patterns, and public holidays.
- **AI Agent and Marketplace Interface:** built interfaces enabling dispatchers to delegate complex, multi-step tasks to autonomous AI agents, significantly increasing operational automation.
- Built onboarding portals so new companies can be onboarded faster with progress saved and tracked across sessions.
- Developed a rideshare feature allowing users to share rides, handling matching logic and real-time seat availability on the frontend.
- Designed and built the company-wide Storybook component library used across all Cab9 portals reusable, scalable components improving maintainability and development speed across the team.
- Recognised for strong UX and product thinking, leading design decisions across key product initiatives and being considered for a future UX leadership role.

Hyperverge Technologies (Internship)

June 2021 - May 2022

- Built the frontend for Hyperstart an AI-powered 0-to-1 CLM (Contract Lifecycle Management) tool used by lawyers and companies to document, manage, and maintain legal agreements through pre- and post-execution phases.
- Gained hands-on experience with encryption/decryption workflows and built responsive, reusable React components under tight product deadlines.
- Devised creative solutions to rapidly evolving product requirements, developing strong instincts for fast-paced, ambiguous development environments.

Freelance Projects

June 2022 - Present

- Delivered 15+ web and mobile projects spanning e-commerce platforms and applications for U.S. healthcare departments, consistently meeting scope, timeline, and quality targets.
- Led end-to-end product cycles: gathered requirements, produced wireframes/prototypes, coded production UI, and oversaw handoff to back-end teams.
- Deepened expertise in modern CSS and advanced selector strategies, enabling pixel-perfect responsive interfaces.

SKILLS

- | | | | |
|------------|--------------------------|----------------|--------------|
| • React JS | • Node JS | • Git | • Javascript |
| • Next JS | • MongoDB | • Tailwind CSS | • HTML/CSS |
| • Vue2 & 3 | • Python | • SCSS | |
| • Figma | • AI (Prophet & XGBoost) | | |

PROJECTS

Anjai Voice

Conversational dispatcher portal voice/text commands sent to AI for autonomous task execution. Built with React, WebSocket integration, and real-time streaming UI.

Cab9 Onboarding Portal

Multi-step company onboarding flow with persistent progress tracking, role configuration, and guided setup wizards.

Rideshare Feature

End-to-end rideshare matching interface for Cab9 passenger grouping, route visualisation, and real-time seat availability.

Anjai Forecast

12-hour booking forecasting tool. Integrated ML model (Prophet & XGBoost) outputs into a responsive dashboard with weather and holiday overlays.

Hyperstart CLM

AI-powered contract lifecycle management tool for law firms document upload, clause tagging, pre/post-execution tracking. Built 0-to-1 in React.

Instagram Clone

Functional replica with account creation, image posting, comments, and likes built with React and Firebase.

EDUCATION

BA.LLB (Hons)

Reva University Yelahanka • 2017–2022

11th & 12th Std

Presidency College Hebbal • 2015–2017
